Cushioning

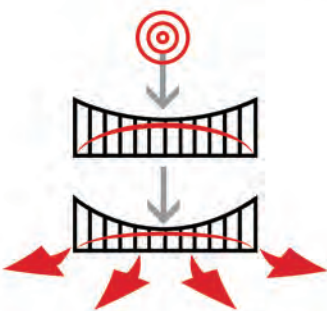

British Innovation

Redbacks[®]

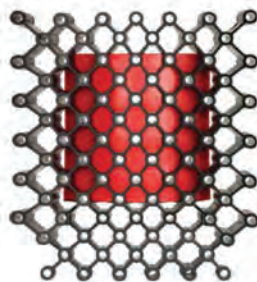

Award winning technology

Scientifically proven **engineered suspension**

Redbacks Cushioning[®] patented system uses a soft flexible leaf spring embedded within a honeycomb matrix to absorb and spread weight. The technology disperses pressure away from the body to provide unrivalled comfort and protection.

Our **SATRA award winning** patented 'Leaf-Spring' technology delivers unrivalled protection and cushioning for the body. Trusted by workers, accredited by industry and verified by science, **Redbacks Cushioning[®]** products are the **number one choice** in performance work wear solutions.

Redbacks Cushioning[®] is about helping people to work safer, more comfortably and for longer, whatever their working or leisure environment. Our mission is to continue to develop class-leading products that promote good health, comfort and wellbeing by reducing pressure on the human anatomy.

Redbacks[®]

Pocket Knee Pads

- Fits pocketed work trousers
- Leaf spring technology
- Reduces point pressure & distributes weight
- Certified to CE EN 14404 Type 2 Level 1
- 100% continuous support
- Supports 0 to 450kg by auto-adjusting to individual's weight
- Waterproof
- Can be left in work trousers for washing at 40°C
- Thermal protection from warm and cold surfaces
- 16mm penetration protection
- Curved to fit around knee
- Long term use
- 100% recyclable pad
